Notes:

1. Annual averages are for the 12-month period of April 2004 - March 2005.
2. The North American Indian and Métis categories are for single responses only.
3. 'Other' category suppressed due to insufficient responses.
4. Data may not sum to totals due to rounding.
5. Annual averages may not equal the same 12-month averages (April 2004 to March 2005) published in previous tables due to differences in weighting methodologies. The differences are minute.
6. Due to small sample sizes, some estimates have large relative standard errors and caution must be exercised when interpreting results.
